

Our Company Policy

It is within the exceptionally beautiful Erdre Valley that our company premises were built nearly 30 years ago.

MHS Electronics Nantes' objective is to offer all its customers the benefits of its know-how dedicated to the Semiconductor technologies.

Our company has built on the founding principle of a continuous improvement system approach in the quality and environment domains.

Improving the quality level of the products and services, whilst reducing our impact on the environment by prevention at the source, is at the core of our actions.

The final goal is to achieve the « **Zero failure** ».

For many years, MHS Electronics Nantes has been recognized for its commitment through standards such as ISO9001, ISO/TS16949, EN9100 and ISO 14001.

Such an approach cannot be carried out without a daily concern for the safety and health of the employees and the preservation of the factory tool.

Moreover, the safeguard of our knowledge, know-how and customer intellectual property constitutes an essential part of our preoccupations and our strategy.

MHS Electronics Nantes Management considers it is vital to federate the employees around a sole and consistent mindset and operating mode. This is why it is bringing its full support to the QSE approach and has initiated a plan to address all security aspects of the site.

As a socially responsible company, MHS guarantees complete control of its internal processes and ensures the high performance of its suppliers and contractors, in the respect of the applicable regulations.

MHS Electronics Nantes proves hereby, its will to continually respond to the expectations of its customers, of its partners and of its employees as well.
